2021 has not turned out to be the year that many had wished for after 2020. Instead, it has decided to look us with a gloomy expression on its face. But we didn't let it take away our sense of humour and looked back even darker in defiance! That's what it's got now. The dark year. Fie, dark year. You can find the result on the front page. Because it scared us a bit, we have built in a (valid) QR code for you. Matching the year with certificates and QR codes. However, this QR code doesn't says anything about our state of health.

It leads to the more colourful Michel reality. So pull out your cell phone, take a picture of the QR code and go! In this spirit, we wish you all happy holidays and only the best for the coming year! In colour.

Love and thanks to Serpil and Markus Mallaun, who once again staged us in their studio.

Julian and Raquel
